# Boxwood

LIBRARY  
FEB 4 1900

Boxwood is an American heritage, and specimens should be cherished like any rare antique. It is truthfully the most beautiful and permanent garden inheritance in this Country.

*With Pardonable Pride We are Presenting  
from the Romantic and Historical Gardens of  
The South an Elaborate Offering of  
Perfect Living Specimens*

---

Symmetrical plants such as the ones above are used extensively in the formal garden. Our garden craftsman within the last ten years has with careful trimming completed several thousand of the above, each a veritable masterpiece.

There is something so sturdy and strong about Boxwood that merely a few clumps can give the garden the stateliness and dignity of having been planted for years.

# BOXWOOD

## "The Aristocrat of Shrubs"

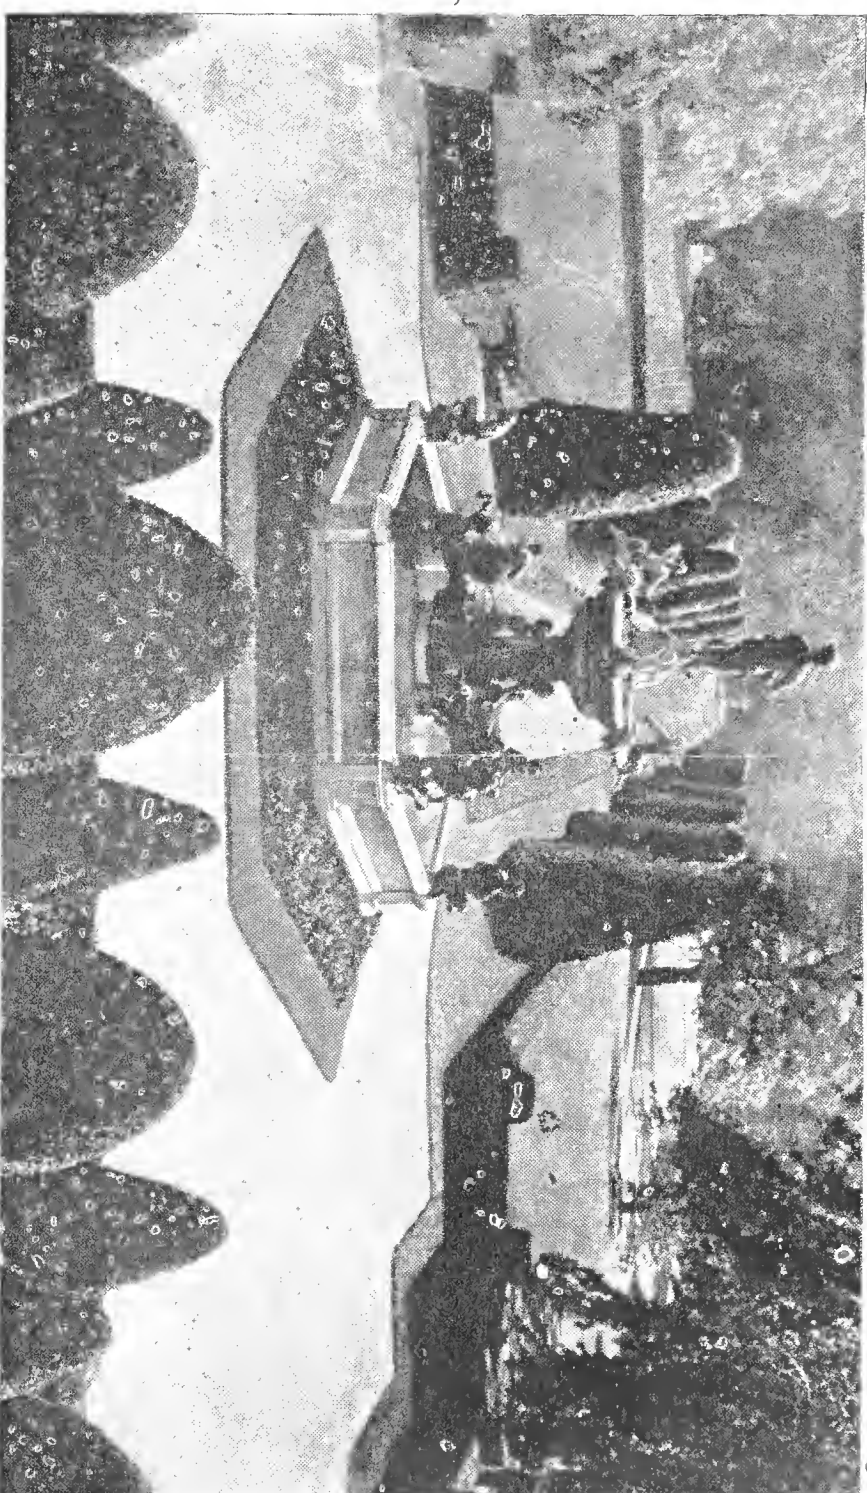

Boxwood aids much in giving atmosphere: that indefinable thing, so much sought, and yet so difficult of attainment in all things artistic. Without it the landscape is uninteresting.

The pungent aroma of Box is well remembered by anyone who has strolled through gardens where Boxwood so poised stood as orderly sentinels.

There is scarcely a ballad or legend of Colonial days that does not tell of a lover scaling the garden wall, or waiting hidden in the Box hedge for a rendezvous with his love.

Gradually, year by year superior boxwood is becoming very scarce. Yearly there is a systematic search for this treasure and in a very few years specimens will be impossible to find. The man securing Royal Oak Boxwood is acquiring something of supreme and haunting beauty.

We are fortunate in being able to say that we have assembled for your selection, both at our nursery and New Work warehouse, matched pairs, beautiful hedges, irregular and picturesque pieces, also many thousands of the small edgings which are used extensively for bordering. We have also, upon numerous requests, developed within the last fifteen years a limited supply of topiary forms (illustrated). All of this is at a cost which is amazingly low. Your inquiry is invited.

New York

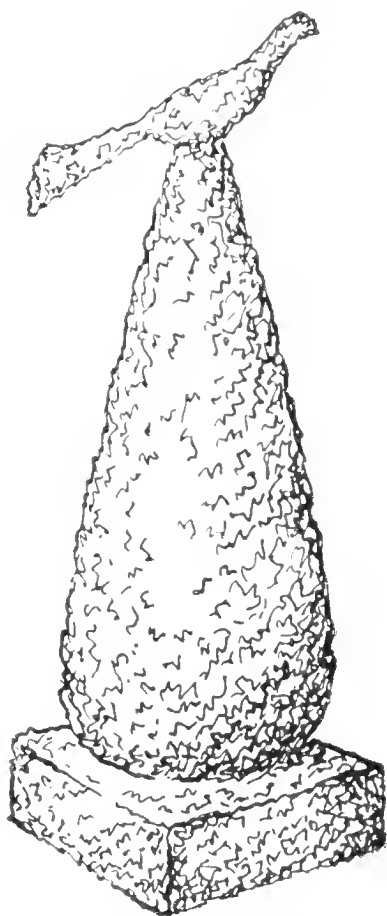

The deep rich velvety green of Boxwood enclosed the brilliance of every old fashioned garden. Old Boxwood holds the charm of romantic environment and new Box brings promise of romance to come.

We have been praised by the leading landscape architects and contractors on the neat way we move and handle our plants. It is the result of fifteen years of experience, in which we have moved over 1000 car loads of Box.

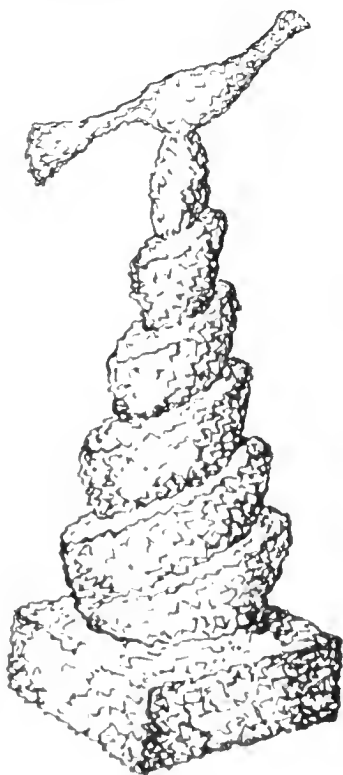

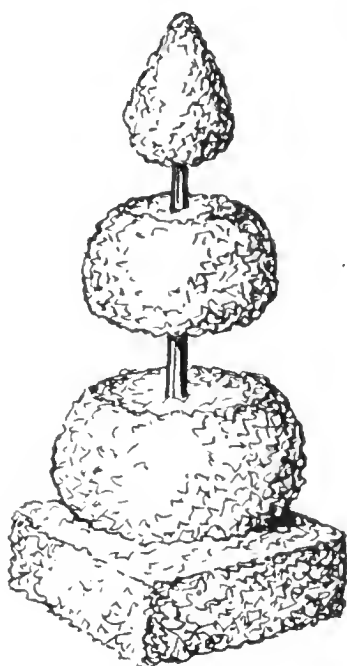

# Topiary Boxwood

Upon the request of numerous landscape architects and clients we have developed during the past 15 years a limited number of this type box, which we are placing on the market for the first time this year. The spirals, urns and fowls have required the constant attention of our craftsman to clip them into the perfect shapes which they now have.

Both the spirals and urns can be secured with or without the fowls. They can be furnished from 3' to 6' in height; average 28" base.

In addition to the above, we also have in stock peacocks, chickens and puppies, all in large dimensions. Upon request we will be glad to give any other information that you may wish, also if there is any other form or shape which you would like to have in the Topiary Box, it is more than probable that we will be able to furnish it.
